

PT-141 is a new innovative peptide hormone treatment that works for both men and women to improve sexual function. PT-141 is an effective and efficient treatment for both erectile dysfunction and increased libido in men and improves female sexual arousal disorder in women.

PT-141 works directly through the nervous system to increase arousal, desire, and satisfaction with sex. Treatments like Viagra and Cialis that work through the vascular system and only give you the ability to achieve an erection. However, PT-141 peptide gives you the desire and motivation along with the ability to achieve an erection, returning the intimacy and passion to your relationship.

PT-141 addresses those issues to help resolve erectile and sexual difficulties. Some important notes on the causes of sexual dysfunction:

- Causes are typically medical, but can be psychological such as guilt, depression, severe anxiety, fear of intimacy, and past sexual trauma
- An underlying medical condition
- Prescription drugs, recreational drugs, alcohol, and smoking can all contribute to or cause ED
- Problems with blood flow, nerve supply and hormones (such as low testosterone) can have a negative impact on erectile function.

If you notice any of the following symptoms on a regular basis, you may be a candidate for PT-141:

- Inability to achieve an erection
- Unable to maintain an erection long enough to complete intercourse
- Inability to ejaculate or delayed ejaculation despite adequate stimulation
- Emotional issues such as embarrassment, shame, anxiety and a reduced interest in sex.
- Lack of desire and inability to become aroused
- Pain with intercourse
- Decreased sensation

Because peptides work through the nervous system and not the cardiovascular system, peptides are safer for a wider variety of people, including those suffering from heart conditions, but still wish to maintain a healthy sex life. If you suffer from sexual dysfunction and/or erectile dysfunction, your provider will help you determine if these medications are appropriate and safe for you.

We understand that sexual and erectile dysfunction can be a difficult thing to discuss. It's important to talk about your concerns with your partner and healthcare provider to get the treatment and care you deserve.

Ask your provider if PT-141 is appropriate for you and your partner.

Benefits of PT-141 for Sexual Dysfunction

- Improved sexual desire and performance
- Regained self-esteem and confidence
- Improved relationship with your partner
- Return to healthy sexual intercourse
- Better, healthier sex which enhances mood, reduces stress, and lessens depression
- Increased benefits when combined with other treatments and hormone therapies

Sexual dysfunction prevents couples from experiencing satisfaction from sexual activity. **Although sexual dysfunction can affect any age**, it is more common in those over 40. Many are hesitant to discuss, but you have **treatment options**, so it's essential to have the conversation with your partner and provider.

Combination Therapy

Using PT-141 in conjunction with other therapies such as sublingual troches, LimitlessPulse Focused Wave Therapy and LimitlessResurrect (PRP Therapy) can have a synergistic effect.

Ask your provider if PT-141 is right for you.
