

PDE5 Inhibitors (Sildenafil and Tadalafil) troches and oral dissolving tablets are a more effective and efficient treatment for erectile health and improved sexual performance.

Decreased sexual performance is a common sexual-arousal disorder that primarily affects men over 40 but can affect men of any age. It is defined as the inability to attain or maintain an erection firm enough for sexual intercourse. PDE5s are oral phosphodiesterase inhibitors (a class of pharmaceutical drugs) that are the pharmacological standard for the treatment of decreased SP.

Causes of decreased SP can range from simple to serious. A proper diagnosis can help address those issues to help resolve erectile and sexual difficulties. Some important notes on the causes of this condition:

- Causes are typically medical, but can be psychological such as guilt, depression, severe anxiety, and fear of intimacy
- An underlying medical condition
- Prescription drugs, recreational drugs, alcohol, and smoking
- Problems with blood flow, nerve supply and hormones (such as low testosterone) can have a negative impact on erectile health.

If you notice any of the following symptoms on a regular basis, you may be a candidate for PDE Inhibitors:

- Inability to achieve an erection
- Unable to maintain an erection long enough to complete intercourse
- Inability to ejaculate
- Emotional issues such as embarrassment, shame, anxiety and a reduced interest in sex.

If you feel like your erectile health is not the same or if you are losing your erection too quickly during intercourse and do not have any pre-existing medical conditions for which you are using nitrates or alpha-blockers, PDE5s may be an option. Your physician will help you determine if these medications are appropriate and safe for you.

We understand that sexual performance can be an embarrassing thing to talk about. We get it. Go ahead and talk to us, we promise no judgment. Let us get you back in the game. **Ask your provider about Troches today.**

Benefits of SPE Treatments

- Regained self-esteem and confidence
- Improved relationship with your partner
- Return to healthy sexual intercourse
- More spontaneous intercourse
- Better, healthier sex which improves mood, reduces stress, and lessens depression
- Sublingual and oral dissolving delivery forms allow the drug to be absorbed in the bloodstream quicker than tablet form. Typically within 30 minutes vs. hours
- Preferable treatment to vacuums and pills that can take too long to work and remove spontaneity
- Support sustained erections if you are losing them too quickly
- Increased benefits when combined with other SPE treatments and hormone therapies
- Date 'nights' turn into date 'weekends.'

Sublingual delivery of PDE5 Inhibitors provide a rapid-drug response returning the **spontaneity** to your **sex life!**

Combination Therapy

Using SPE Treatments in conjunction with other therapies such as Testosterone Replacement Therapy, LimitlessPulse™ Focused Wave Therapy and LimitlessResurrect™ (Platelet-Rich Plasma) can enhance and increase your results.

Ask your provider if oral SPE treatments are right for you.

WEEKENDER & NIGHTER | RETURN TO HEALTHY SEXUAL INTERCOURSE

ZEUS & HERCULES | INCREASE ERECTION STRENGTH, LIBIDO, & SEXUAL DESIRE

Increase your sexual performance with Zeus and Hercules, custom oral ED medications that each combines three sexual enhancing drugs for ultimate performance. PT-141 and Oxytocin are combined with Sildenafil OR Tadalafil to increase sexual desire and blood flow to the penis, creating harder, longer-lasting erections. Each medication has the following individual benefits:

THOR | ELITE SEXUAL PERFORMANCE ENHANCING OPTION

Get the elite sexual experience with Thor, our 4-in-1 sexual performance enhancing medication.

This sexual performance enhancing medication combines the four major erectile enhancing medications; Tadalafil, Sildenafil, PT-141, and Oxytocin to bring you stronger, longer lasting erections while increasing your libido, desire, and confidence. Thor is a sublingual sexual performance enhancing medication, which absorbs quickly and directly into your bloodstream. You are getting it all with Thor.

MEDICATION PURPOSES

- **Sildenafil (generic Viagra®) OR Tadalafil (generic Cialis®)**
Used to promote erection strength and quality while also increasing confidence and self-esteem.
- **Oxytocin** | Referred to as the “love hormone,” is a neuropeptide that mainly functions in the central nervous system to increase bonding and sexual stimulation.
- **PT-141 (Bremelanotide)** | Works directly through the nervous system to increase arousal, desire, and satisfaction with sex.
